ALDO MARCELINO

FULL STACK ENGINEER

+62822-6758-0929 | aldo115marcelino@gmail.com | LinkedIn | GitHub |Jakarta, Indonesia

SUMMARY

Full Stack Engineer with 3+ years of experience building scalable, production-grade web applications for fintech and SaaS environments. Strong expertise in Next.js, TypeScript, and NestJS with hands-on experience designing microservices, improving performance, and implementing high test coverage systems. Experienced collaborating with international teams (Singapore-based company) and delivering high-impact user-facing platforms.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, GraphQL, Python (basic), Go (learning)
Frontend: React, Next.js, React Native, Redux, Tailwind CSS, MUI, Ant Design, Vue
Backend: Node.js, NestJS, Express.js, Apollo Server
Databases: PostgreSQL, MongoDB, Firebase
Architecture: REST APIs, GraphQL APIs, Microservices, API Gateway
DevOps & Tools: Docker, Git, GitHub Actions (basic), Vercel, Heroku, Postman

PROFESSIONAL EXPERIENCE

Full Stack Engineer
Singapore-based SaaS Company (L'tria Tribe Benefits) – Remote — Aug 2024 – Present

- Developed and maintained two production SaaS platforms using:
  - Next.js + TypeScript + MongoDB
  - Next.js + TypeScript + NestJS + PostgreSQL
- Designed scalable backend services and authentication flows supporting multi-tenant architecture.
- Built reusable frontend component systems to improve development efficiency.
- Collaborated with cross-functional international teams on system architecture and feature planning.
- Improved application performance and ensured SEO optimization across public-facing pages.
- Contributed to API design and backend modularization to support long-term scalability.

Frontend Engineer (Contract)
CIMB Niaga – Jakarta, Indonesia — Dec 2023 – Nov 2024

- Contributed to the Personal Banking Portal built with Next.js and TypeScript.
- Improved Core Web Vitals performance score from ~60 to 95+.
- Increased SEO score to 100 through performance optimization and semantic structure improvements.
- Refactored legacy UI components for consistency and accessibility compliance.
- Increased unit test coverage from 0% to 90%+ using Jest and Testing Library.
- Implemented reusable design system components to standardize UI patterns.

Full Stack Engineer
PT Era Awan Digital (Eranyacloud) – Jakarta, Indonesia — Dec 2022 – Jan 2024

- Built and maintained full-stack web applications based on product and UI/UX requirements.
- Designed and implemented API Gateway architecture using NestJS to orchestrate 3+ microservices.
- Integrated frontend applications with backend services using Axios and Redux-Saga.
- Collaborated with infrastructure teams to define API contracts and service communication.
- Documented full application flow and performed end-to-end validation testing.
- Contributed to scalable service design to support growing platform features.

SELECTED PROJECTS

Netflix Clone – Microservices Architecture
Full-stack web & mobile application with CMS dashboard.
Tech: Next.js, NestJS, GraphQL, PostgreSQL, MongoDB, Redis, Docker

- Designed microservices-based architecture separating client, admin, and service layers.

- Implemented authentication and state management using Redux.
- Integrated GraphQL API with Apollo Client and Server.

Savvie – Food Rescue Marketplace (Mobile + CMS)
Tech: MERN/PERN Stack, Expo, Redux, Xendit API
- Developed a full-stack marketplace enabling restaurants to sell surplus food.
- Integrated payment gateway and implemented real-time order flow.
- Built a CMS dashboard for vendor management and reporting.

EDUCATION

Bachelor of Informatics Engineering
Universitas Dian Nuswantoro – Semarang, Indonesia Graduate Aug 2023
Cumulative GPA: 3.44/4.0
Relevant Coursework: Algorithms, Data Structures, Clean Code and Design Patterns, Object-Oriented Programming; Database

Full Stack JavaScript Program
Hacktiv8 – Jakarta, Indonesia Graduate Nov 2022
Grades: 94.3/100
Relevant Coursework: Fundamental Programming, Data Structure, Object-Oriented Programming, Application Structure, Client-Server Model, Minimum Viable Product

ADDITIONAL INFORMATION

- Experience working with Singapore-based teams in a remote environment.
- Strong focus on clean architecture, performance optimization, and scalable system design.
- Currently expanding skills in system design, cloud infrastructure, and distributed systems.
